

INCOSE UK Annual Systems Engineering Conference 12th and 13th November 2013

Effective Systems Engineering

Student / Graduate Poster Competition

INCOSE UK's Annual Systems Engineering Conference (ASEC 2013) is the major Systems Engineering event in the UK, offering two days of presentations, tutorials and workshops from experts in the field. In a new development for this year, students and graduates are invited to submit posters showcasing their knowledge or research.

Competition Details

Posters are to be submitted on a Systems Engineering subject matter. A number of sub-themes have been identified for the main technical programme, but these should not be considered as constraints if you have something innovative and interesting to say:

Essential Systems Engineering	what are the essential building blocks of SE
Advancing your Practice	how do you and your organisation become better at SE
Systems Engineering Techniques and Tools	which SE techniques and tools work best when
Addressing Systems Engineering Problems	where are SE methods most effective

All student posters submitted will be judged by a panel organised by the INCOSE UK Advisory Board. The top ten posters will be prominently displayed in the venue for both days of the conference.

The panel will also select a top three from this shortlist, and the students submitting these top three posters will receive the following:

FREE ENTRY to Day Two of ASEC 2013

Entry into the final round of judging, where conference delegates will vote for the winning poster

The overall winner will be given a presentation slot in the afternoon to present their subject matter in the main lecture theatre.

They will also receive a cash prize, and a personal award from INCOSE UK.

Submitting entries

Let us know **as soon as possible** if you wish to submit a poster for consideration (see contact details below)

By no later than 31st August 2013 submit a poster in soft copy, using the standard template, to the contact address shown below

Selected poster authors are encouraged to produce a paper for inclusion in the conference proceedings

Further information

- To qualify for entry, poster authors must be enrolled in education within engineering or related fields, or be on an industrial graduate programme
- Membership of INCOSE is not required
- A standard AO sized poster template will be provided, and INCOSE UK will take the responsibility for printing the posters and displaying them at the venue
- Final conference posters will be selected and notified by mid-September 2013
- Please send your indication of intent to submit an entry, or any queries on the submission process, to academic-director@incoseonline.org.uk, or contact the INCOSE UK Secretariat on +44 1460 259540
- The Annual Systems Engineering Conference 2013 will be held at Heythrop Park, Enstone, OX7 5UF on 12th and 13th November 2013. The conference web site can be found at www.incoseonline.org.uk
