

Press Release

INCOSE UK welcomes two more UK Companies to our growing Advisory Board

Raytheon UK and SA Capabilities have joined the INCOSE UK Advisory Board (UKAB) in the last month bringing the membership to 32 organisations, all of whom are committed to Systems Engineering.

The UKAB was established in order to bridge the gap between INCOSE UK and the employers of its individual members. The purpose of the UKAB is to allow UK Systems Engineering Enterprises (Industry, Government & Academia) to have their say in influencing the

practice of Systems Engineering and to realise directly the benefits of INCOSE UK membership within their own organisations.

Prof Mike Wilkinson, the INCOSE UK President from November 2010 to November 2012, said "I am delighted that one of my last acts as President of INCOSE UK is to welcome two more companies to the UKAB, a group of 32 organisations who work closely with our Council, helping us influence the UK Systems Engineering Environment. I know the Advisory Board is looking forward to having representatives from Raytheon and SA Capabilities adding to the debate"

Dated 6 November 2012

Notes to Editors

INCOSE UK

The UK Chapter of the International Council on Systems Engineering (INCOSE), with around 700 individual and 32 corporate members, exists primarily to serve UK-specific needs and is a key chapter within INCOSE. It has strong links with other UK institutions and it plays a prominent role in both the domestic and the international scenes. It holds one or two conferences each year, has active regional, working and special interest groups and publishes a variety of guides and other products tailored for UK

Press Release

members. Despite its focus on UK-specific needs, the UK Chapter attracts members from territories around the globe.

The 'flavour' of systems engineering most prevalent in the UK has developed into an open and inclusive practice that facilitates the application of systems thinking and systems engineering principles in domains outside of the traditional domains of defence and aerospace. In recent years the membership of INCOSE UK has widened significantly from its roots, expanding to include domains such as transportation - particularly rail - energy, civil engineering, space, medicine, and security.
